Best Practices of the Institute

2022-2023

Infrastructural Support

Ours is half a century old institution with a remarkable academic heritage. With a vision to provide better atmosphere to the students, the pioneers had created contemporarily up to the mark campus. But as the time passed and educational requirements got changed accordingly, the institute needed some separate infrastructural facilities. In order to realize the needs, the IQAC suggested few infrastructural developments to the local governing body. And through the approval of the trustees, the institution could have new NSS/ NCC Rooms, Indoor Sports Hall and designated Students Rest Area this year. The added amenities proved to be beneficial for relative purposes.

Beautification of Botanical Garden

The institution offers 'Botany' as one of the subjects to the science stream students. As a part of the curriculum of the subject the students need to have some practical experiences with plants and other flora. To justify the requirements of botany students, the institute, this year, beautified the old Botanical Garden, by cultivating new plants and tagging the trees with their botanical nomenclature.
